

HTML Chapter 1

Introduction to HTML

Learn the basics of HTML with easy explanations, examples and exam notes.

Did You Know?

HTML was created by Tim Berners-Lee in 1991 and is the foundation of every website.

What is HTML?

HTML stands for **HyperText Markup Language**. It is the standard markup language used to create web pages. HTML provides the basic structure of a webpage by using different tags.

Why do we use HTML?

- Create webpages
- Display text and images
- Create links between pages
- Create forms
- Display tables and lists

Features of HTML

- Easy to Learn
- Platform Independent
- Supported by all browsers
- Works with CSS and JavaScript
- Free and Open Standard

HTML Page Structure

```
<!DOCTYPE html>

<html>

<head>

<title>My First Page</title>

</head>

<body>

<h1>Hello World</h1>

<p>Welcome to HTML</p>

</body>

</html>
```

Important HTML Tags

Tag	Purpose
<html>	Main HTML document
<head>	Stores page information
<title>	Browser title

<body>	Main webpage content
<h1>	Main Heading
<p>	Paragraph

Advantages of HTML

- Simple syntax
- Easy to understand
- Fast webpage creation
- SEO friendly
- Compatible with all browsers

Limitations of HTML

- Cannot create dynamic websites alone

- Needs CSS for design
- Needs JavaScript for interactivity

Real Life Uses

- Websites
- Blogs
- Portfolio Pages
