

Did You Know?

HTML5 introduced many new features like audio, video, canvas, semantic tags and APIs without requiring extra plugins.

What is HTML5?

HTML5 is the latest version of HTML. It provides new tags, multimedia support, graphics and better webpage performance.

New Features of HTML5

Feature	Purpose
---------	---------

Audio	Play audio files
Video	Play videos
Canvas	Draw graphics
SVG	Vector graphics
Semantic Tags	Better webpage structure
Local Storage	Store browser data

Audio Example

```
<audio controls>  
<source src="music.mp3">  
</audio>
```

Video Example

```
<video controls width="400">  
<source src="movie.mp4">  
</video>
```

Canvas Example

```
<canvas width="300" height="200">  
</canvas>
```

Advantages of HTML5

- Supports multimedia
- No extra plugins required
- Improves SEO
- Better accessibility

- Faster performance
- Supports mobile devices

Limitations

- Older browsers have limited support
- Complex graphics require JavaScript
- Advanced applications need CSS and JavaScript
